

Transportation - Ask for Infrastructure Money to reduce Maintenance & Downtime – ECOFUELMAX

Everyone wants to keep their vehicles on the road, not in the shop. The Government is allocating Billions for Infrastructure and fighting Pollution. Now you may be able to get paid for helping reduce pollution and saving money.

FORT LAUDERDALE, Fla. - May 26, 2021 - [PRLog](#) -- For years Transit and Trucking professionals have been fighting maintenance and vehicle downtime caused by Diesel Particulate Filters (DPF's) getting clogged with Carbon Pollution/Particulates. Those who want to save maintenance expenses, increase efficiency and reduce downtime may be able to get help by the recent or upcoming allocation of stimulus dollars.

Any and all School Bus, Transit Bus or Truck Owner Fleet/Transit Managers should be interested in a proven guaranteed solution to reduce costs in excess of \$3,000/year for a onetime expense of \$395. The ECOFuelMax Pollution solution is an answer.

The ECOFuelMax is an easy to install inline fuel filter that by the scientific principal of Electrolysis increases a fuels (diesel-gasoline) combustibility causing it to burn cleaner with increased efficiency. The ECO has been tested and approved by tens of thousands of users around the world. The United States Government along with over 200 School Districts in Texas have been using it for over 10 years.

The ECO has been around for over 15 years, in no way modifies any motor and does not affect any warranties. It is sold with No Risk with a Money Back Guarantee. Manufactured in the USA by a BBB A+ company.

For more information or details on how to do your own No Risk test go online <https://ecofuelmax.com> or call and speak with a human.
